Thin Solid Films 325 (1998) 280–284

thin solid films

Subject Index of Volume 325

Adhesion
Correlation between the adhesion and the thermal contact resistance: effects of substrate surface ion bombardment etching, 156
Adsorption-control
Adsorption-controlled growth of $PbTiO_3$ by reactive molecular beam epitaxy, 107
Amorphous materials
Raman-based measurements of optical properties of thin solid films: application to amorphous diamond, 192
Anisotropy
Molecular recognition of nucleolipid amphiphile octadecanoyl ester of 1-(2-carboxyethyl) adenine to the complementary nucleobases: part II. A Fourier transform infrared spectroscopic study of Langmuir–Blodgett films, 210
Annealing
Annealing effects on silicon-rich oxide films studied by spectroscopic ellipsometry, 36
Antiferromagnetic coupling
Magnetism in Cr thin films on V(001), 201
Antimony
Formulation and characterization of ZnO:Sb thick-film gas sensors, 254
Atomic force microscopy
Scanning probe microscopy of vacuum-arc-deposited metallic and diamond-like carbon thin films, 19
Surface roughness of oxidised copper films studied by atomic force microscopy and spectroscopic light scattering, 92
Molecular arrangements in Langmuir–Blodgett films of 2-dodecyl-, 2-pentadecyl- and 2-octadecyl-7,7,8,8-tetracyanoquinodimethanes, 204
D-thin films of ferrocene derivatives: optical gas sensing and structural studies, 223
Auger electron spectroscopy
Preparation and characterization of thin films by plasma polymerization of hexamethyldisiloxane, 83

Band structure
Silicon MIS structures using samarium oxide films, 151
Blue photoluminescence
Does the fast, blue photoluminescence from spark-processed silicon originate from tungsten doping?, 1
Buffer layer
Local nucleation and lateral crystallization of silicide cobalt phases at interaction of cobalt film with silicon surface, 145

Carbon
Scanning probe microscopy of vacuum-arc-deposited metallic and diamond-like carbon thin films, 19
The mechanical performance of DLC films on steel substrates, 163
Carbon dioxide
Combined effect of nitrogen and pulsed microwave plasma on diamond growth using CH_4–CO_2 gas mixture, 7
Carbon nitride
Characterization of carbon nitride thin films deposited by a combined RF and DC plasma beam, 123
Ceramic
Correlation between the adhesion and the thermal contact resistance: effects of substrate surface ion bombardment etching, 156
Chemical vapour deposition (CVD)
Oxy-acetylene flame chemical vapour deposition of diamond films. Part I: the influence of deposition parameters on diamond morphology, 99
Preparation of YVO_4 thin films by metal organic chemical vapor deposition, 115
Co–Ta–Si
Formation of Co and Ta silicides on Si(111) and Si(100) substrates from codeposited Co and Ta thin films, 60
Complexation behaviour
Formation of mono- and multilayers of metal complexes of 4-(((10,12-pentacosadiynoyl)oxy)methyl)pyridine, 238
Conductivity
Ionic transport and galvanic cell discharge characteristics of $CuPbI_3$ thin films, 246
Contacts
Summary of Schottky barrier height data on epitaxially grown n- and p-GaAs, 181
Copper nitride film
Thermal stability of copper nitride films prepared by rf magnetron sputtering, 55
Cr thin films
Magnetism in Cr thin films on V(001), 201
Crystallisation
Oxy-acetylene flame chemical vapour deposition of diamond films. Part I: the influence of deposition parameters on diamond morphology, 99
Cu films
Correlation between the adhesion and the thermal contact resistance: effects of substrate surface ion bombardment etching, 156

Degradation mechanism
Degradation in organic light-emitting diodes, 175
Diacetylene derivative
Formation of mono- and multilayers of metal complexes of 4-(((10,12-pentacosadiynoyl)oxy)methyl)pyridine, 238
Diamond
Combined effect of nitrogen and pulsed microwave plasma on diamond growth using CH_4–CO_2 gas mixture, 7
Oxy-acetylene flame chemical vapour deposition of diamond films. Part I: the influence of deposition parameters on diamond morphology, 99

0040-6090/98/$19.00 © 1998 Elsevier Science S.A. All rights reserved
PII S0040-6090(98)00899-2

The mechanical performance of DLC films on steel substrates, 163
Dielectric properties
Preparation and characterization of thin films by plasma polymerization of hexamethyldisiloxane, 83

Electrical properties and measurements
Summary of Schottky barrier height data on epitaxially grown n- and p-GaAs, 181
Electrical behaviour of fresh and stored porous silicon films, 271
Electronic devices
Electroluminescent devices based on monohexadecyl phthalate terbium, 259
Epitaxy
Adsorption-controlled growth of $PbTiO_3$ by reactive molecular beam epitaxy, 107
Preparation of YVO_4 thin films by metal organic chemical vapor deposition, 115

Fast
Does the fast, blue photoluminescence from spark-processed silicon originate from tungsten doping?, 1
Fatigue degradation
The effects of $PbTiO_3$ thin template layer and Pt/RuO_2 hybrid electrode on the ferroelectric properties of sol-gel derived PZT thin film, 72
Ferrocene
D-thin films of ferrocene derivatives: optical gas sensing and structural studies, 223
Ferroelectric thin film
The effects of $PbTiO_3$ thin template layer and Pt/RuO_2 hybrid electrode on the ferroelectric properties of sol-gel derived PZT thin film, 72
FeSi Films
Substrate influence on the formation of FeSi and $FeSi_2$ films from *cis*-$Fe(SiCl_3)_2(CO)_4$ by LPCVD, 87
Film composition
Substrate influence on the formation of FeSi and $FeSi_2$ films from *cis*-$Fe(SiCl_3)_2(CO)_4$ by LPCVD, 87
Film formation
Substrate influence on the formation of FeSi and $FeSi_2$ films from *cis*-$Fe(SiCl_3)_2(CO)_4$ by LPCVD, 87
Fourier transform infrared spectroscopy
Preparation and characterization of thin films by plasma polymerization of hexamethyldisiloxane, 83
Molecular recognition of nucleolipid amphiphile octadecanoyl ester of 1-(2-carboxyethyl) adenine to the complementary nucleobases: part II. A Fourier transform infrared spectroscopic study of Langmuir–Blodgett films, 210
Ordering phenomena in composite monolayers and Langmuir–Blodgett films, 232

Gas sensor
D-thin films of ferrocene derivatives: optical gas sensing and structural studies, 223
Gold
Electroluminescence from Au/extra-thin Si-rich SiO_2 film/n^+-Si under reverse biases and its mechanism, 137

Halides
Ionic transport and galvanic cell discharge characteristics of $CuPbI_3$ thin films, 246
Hybrid electrode
The effects of $PbTiO_3$ thin template layer and Pt/RuO_2 hybrid electrode on the ferroelectric properties of sol-gel derived PZT thin film, 72
Hydrogen
Formulation and characterization of ZnO:Sb thick-film gas sensors, 254
Hysteresis
Pyroelectric hysteresis in ferroelectric polymers, 187

Interfaces
Silicon MIS structures using samarium oxide films, 151
Ion etching
Correlation between the adhesion and the thermal contact resistance: effects of substrate surface ion bombardment etching, 156

Kinetics
Formation of Co and Ta silicides on Si(111) and Si(100) substrates from codeposited Co and Ta thin films, 60

Langmuir–Blodgett films
Molecular arrangements in Langmuir–Blodgett films of 2-dodecyl-, 2-pentadecyl- and 2-octadecyl-7,7,8,8-tetracyanoquinodimethanes, 204
Molecular recognition of nucleolipid amphiphile octadecanoyl ester of 1-(2-carboxyethyl) adenine to the complementary nucleobases: part II. A Fourier transform infrared spectroscopic study of Langmuir–Blodgett films, 210
Normally aligned π-conjugated Langmuir–Blodgett films of oligo-acene amphiphiles, 218
D-thin films of ferrocene derivatives: optical gas sensing and structural studies, 223
Ordering phenomena in composite monolayers and Langmuir–Blodgett films, 232
Formation of mono- and multilayers of metal complexes of 4-(((10,12-pentacosadiynoyl)oxy)methyl)pyridine, 238
Lateral crystal growth
Local nucleation and lateral crystallization of silicide cobalt phases at interaction of cobalt film with silicon surface, 145
Light-emitting diodes
Degradation in organic light-emitting diodes, 175
Low-pressure chemical vapor deposition
Substrate influence on the formation of FeSi and $FeSi_2$ films from *cis*-$Fe(SiCl_3)_2(CO)_4$ by LPCVD, 87
Luminescence
Structural and photoluminescent characteristics of yttrium–aluminum oxide films doped with Tb, Eu or Ce, 14
Electroluminescence from Au/extra-thin Si-rich SiO_2 film/n^+-Si under reverse biases and its mechanism, 137
Electroluminescent devices based on monohexadecyl phthalate terbium, 259

Magnetism
Magnetism in Cr thin films on V(001), 201
Magnetron sputtering deposition
Thermal stability of copper nitride films prepared by rf magnetron sputtering, 55

Mean critical load
Correlation between the adhesion and the thermal contact resistance: effects of substrate surface ion bombardment etching, 156
Metal oxide semiconductor structure (MOS)
Silicon MIS structures using samarium oxide films, 151
Metallization
Summary of Schottky barrier height data on epitaxially grown n- and p-GaAs, 181
MINDO/3
Electroluminescent properties of naphthalimide derivative thin film devices, 268
Monolayers
Ordering phenomena in composite monolayers and Langmuir–Blodgett films, 232
Multilayers
Molecular recognition of nucleolipid amphiphile octadecanoyl ester of 1-(2-carboxyethyl) adenine to the complementary nucleobases: part II. A Fourier transform infrared spectroscopic study of Langmuir–Blodgett films, 210
Electroluminescent devices based on monohexadecyl phthalate terbium, 259

Naphthalimide
Electroluminescent properties of naphthalimide derivative thin film devices, 268
Nickel–iron alloy
Improvement of electromagnetic coil's Q-value by ferric magnetic thin film, 198
Nitrogen
Combined effect of nitrogen and pulsed microwave plasma on diamond growth using CH_4–CO_2 gas mixture, 7
Nitrogen dioxide
D-thin films of ferrocene derivatives: optical gas sensing and structural studies, 223

Oligo-acene amphiphile
Normally aligned π-conjugated Langmuir–Blodgett films of oligo-acene amphiphiles, 218
Optical alignment of liquid crystals
Morphological investigation of polyvinyl-4-methoxy cinnamate photopolymer thin and ultrathin films under linear photopolymerization, 251
Optical properties
Structural and photoluminescent characteristics of yttrium–aluminum oxide films doped with Tb, Eu or Ce, 14
XPS characterization and optical properties of Si/SiO_2, Si/Al_2O_3 and Si/MgO co-sputtered films, 130
Raman-based measurements of optical properties of thin solid films: application to amorphous diamond, 192
Optical spectroscopy
Structural and photoluminescent characteristics of yttrium–aluminum oxide films doped with Tb, Eu or Ce, 14
An optical fibre based evanescent wave sensor to monitor the deposition rate of thin films, 264
Organic thin film electroluminescence
Electroluminescent properties of naphthalimide derivative thin film devices, 268
Organometallic vapor deposition
Preparation of YVO_4 thin films by metal organic chemical vapor deposition, 115
Oxidation
Surface roughness of oxidised copper films studied by atomic force microscopy and spectroscopic light scattering, 92
Oxides
Structural and photoluminescent characteristics of yttrium–aluminum oxide films doped with Tb, Eu or Ce, 14
Oxide MBE
Adsorption-controlled growth of $PbTiO_3$ by reactive molecular beam epitaxy, 107
Ozone
Adsorption-controlled growth of $PbTiO_3$ by reactive molecular beam epitaxy, 107

$PbTiO_3$
Adsorption-controlled growth of $PbTiO_3$ by reactive molecular beam epitaxy, 107
Phase formation
Formation of Co and Ta silicides on Si(111) and Si(100) substrates from codeposited Co and Ta thin films, 60
Photoluminescence
Electroluminescent properties of naphthalimide derivative thin film devices, 268
Photopolymer film
Morphological investigation of polyvinyl-4-methoxy cinnamate photopolymer thin and ultrathin films under linear photopolymerization, 251
Phthalocyanines
Raman polarization studies of the orientation of molecular thin films, 140
Physical properties
Growth of polycrystalline SnS films by spray pyrolysis, 4
π-Conjugated system
Normally aligned π-conjugated Langmuir–Blodgett films of oligo-acene amphiphiles, 218
Plasma deposition techniques
Characterization of carbon nitride thin films deposited by a combined RF and DC plasma beam, 123
Plasma enhanced chemical vapor deposition
Annealing effects on silicon-rich oxide films studied by spectroscopic ellipsometry, 36
Plasma processing and deposition
Combined effect of nitrogen and pulsed microwave plasma on diamond growth using CH_4–CO_2 gas mixture, 7
Scanning probe microscopy of vacuum-arc-deposited metallic and diamond-like carbon thin films, 19
Preparation and characterization of thin films by plasma polymerization of hexamethyldisiloxane, 83
An optical fibre based evanescent wave sensor to monitor the deposition rate of thin films, 264
Polymers
The adsorption of 2,4,6-triphenyl-1,3,5-triazine on Si(111) 7×7 studied by STM, 24
Pyroelectric hysteresis in ferroelectric polymers, 187
An optical fibre based evanescent wave sensor to monitor the deposition rate of thin films, 264
Pyroelectric
Pyroelectric hysteresis in ferroelectric polymers, 187
Pyrolysis
Structural and photoluminescent characteristics of yttrium–aluminum oxide films doped with Tb, Eu or Ce, 14
PZT

The effects of $PbTiO_3$ thin template layer and Pt/RuO_2 hybrid electrode on the ferroelectric properties of sol-gel derived PZT thin film, 72

Quality factor
Improvement of electromagnetic coil's *Q*-value by ferric magnetic thin film, 198
Quantum effects
Electrical behaviour of fresh and stored porous silicon films, 271

Raman scattering
Raman-based measurements of optical properties of thin solid films: application to amorphous diamond, 192
Raman spectra
Raman polarization studies of the orientation of molecular thin films, 140
Reflection spectroscopy
Surface roughness of oxidised copper films studied by atomic force microscopy and spectroscopic light scattering, 92
Reflectometry
D-thin films of ferrocene derivatives: optical gas sensing and structural studies, 223
RF plasma beam discharge
Characterization of carbon nitride thin films deposited by a combined RF and DC plasma beam, 123

Scanning tunneling microscopy
Scanning probe microscopy of vacuum-arc-deposited metallic and diamond-like carbon thin films, 19
The adsorption of 2,4,6-triphenyl-1,3,5-triazine on Si(111) 7×7 studied by STM, 24
Comparative scanning tunneling microscopic and rocking-curve X-ray characterization of metallic thin films, 30
Schottky barrier
Summary of Schottky barrier height data on epitaxially grown n- and p-GaAs, 181
Scratch test
Correlation between the adhesion and the thermal contact resistance: effects of substrate surface ion bombardment etching, 156
Sensors
Formulation and characterization of ZnO:Sb thick-film gas sensors, 254
An optical fibre based evanescent wave sensor to monitor the deposition rate of thin films, 264
Silicides
Formation of Co and Ta silicides on Si(111) and Si(100) substrates from codeposited Co and Ta thin films, 60
Local nucleation and lateral crystallization of silicide cobalt phases at interaction of cobalt film with silicon surface, 145
Silicon
The adsorption of 2,4,6-triphenyl-1,3,5-triazine on Si(111) 7×7 studied by STM, 24
XPS characterization and optical properties of Si/SiO_2, Si/Al_2O_3 and Si/MgO co-sputtered films, 130
Electrical behaviour of fresh and stored porous silicon films, 271
Silicon oxide
Electroluminescence from Au/extra-thin Si-rich SiO_2 film/n^+-Si under reverse biases and its mechanism, 137
Silicon-rich oxide films
Annealing effects on silicon-rich oxide films studied by spectroscopic ellipsometry, 36
Skin effect
Improvement of electromagnetic coil's *Q*-value by ferric magnetic thin film, 198
Sol-gel method
The effects of $PbTiO_3$ thin template layer and Pt/RuO_2 hybrid electrode on the ferroelectric properties of sol-gel derived PZT thin film, 72
Thickness dependence of the structural properties of sol-gel derived $Sr_{0.6}Ba_{0.4}Nb_2O_6$ films, 79
Solid electrolyte interface
Ionic transport and galvanic cell discharge characteristics of $CuPbI_3$ thin films, 246
Solid state polymerisation
Formation of mono- and multilayers of metal complexes of 4-(((10,12-pentacosadiynoyl)oxy)methyl)pyridine, 238
Spark-processed silicon
Does the fast, blue photoluminescence from spark-processed silicon originate from tungsten doping?, 1
Spray pyrolysis
Growth of polycrystalline SnS films by spray pyrolysis, 4
Sputtering
XPS characterization and optical properties of Si/SiO_2, Si/Al_2O_3 and Si/MgO co-sputtered films, 130
Steel
The mechanical performance of DLC films on steel substrates, 163
Stress
Full field measurements of curvature using coherent gradient sensing: application to thin film characterization, 42
Strontium barium nitrobates
Thickness dependence of the structural properties of sol-gel derived $Sr_{0.6}Ba_{0.4}Nb_2O_6$ films, 79
Structural properties
Thickness dependence of the structural properties of sol-gel derived $Sr_{0.6}Ba_{0.4}Nb_2O_6$ films, 79
Electroluminescence from Au/extra-thin Si-rich SiO_2 film/n^+-Si under reverse biases and its mechanism, 137
Molecular arrangements in Langmuir–Blodgett films of 2-dodecyl-, 2-pentadecyl- and 2-octadecyl-7,7,8,8-tetracyanoquinodimethanes, 204
Surface and interface states
Silicon MIS structures using samarium oxide films, 151
Surface defects
Full field measurements of curvature using coherent gradient sensing: application to thin film characterization, 42
Surface morphology
Comparative scanning tunneling microscopic and rocking-curve X-ray characterization of metallic thin films, 30
Full field measurements of curvature using coherent gradient sensing: application to thin film characterization, 42
Oxy-acetylene flame chemical vapour deposition of diamond films. Part I: the influence of deposition parameters on diamond morphology, 99
Local nucleation and lateral crystallization of silicide cobalt phases at interaction of cobalt film with silicon surface, 145
Morphological investigation of polyvinyl-4-methoxy cinnamate photopolymer thin and ultrathin films under linear photopolymerization, 251

Surface roughness
Surface roughness of oxidised copper films studied by atomic force microscopy and spectroscopic light scattering, 92

Tebrium
Electroluminescent devices based on monohexadecyl phthalate terbium, 259
Template layer
The effects of $PbTiO_3$ thin template layer and Pt/RuO_2 hybrid electrode on the ferroelectric properties of sol-gel derived PZT thin film, 72
Thermal contact resistance
Correlation between the adhesion and the thermal contact resistance: effects of substrate surface ion bombardment etching, 156
Thermal stability
Thermal stability of copper nitride films prepared by rf magnetron sputtering, 55
Thin films
Adsorption-controlled growth of $PbTiO_3$ by reactive molecular beam epitaxy, 107
Characterization of carbon nitride thin films deposited by a combined RF and DC plasma beam, 123
Raman polarization studies of the orientation of molecular thin films, 140
Tin monosulfide thin films
Growth of polycrystalline SnS films by spray pyrolysis, 4
Transport layers
Degradation in organic light-emitting diodes, 175

X-ray diffraction
Comparative scanning tunneling microscopic and rocking-curve X-ray characterization of metallic thin films, 30
Full field measurements of curvature using coherent gradient sensing: application to thin film characterization, 42
Ordering phenomena in composite monolayers and Langmuir–Blodgett films, 232
X-ray photoelectron spectroscopy (XPS)
XPS characterization and optical properties of Si/SiO_2, Si/Al_2O_3 and Si/MgO co-sputtered films, 130
Correlation between the adhesion and the thermal contact resistance: effects of substrate surface ion bombardment etching, 156
D-thin films of ferrocene derivatives: optical gas sensing and structural studies, 223

Yttrium
Structural and photoluminescent characteristics of yttrium–aluminum oxide films doped with Tb, Eu or Ce, 14

Zinc oxide
Formulation and characterization of ZnO:Sb thick-film gas sensors, 254
Z-type deposition
Normally aligned π-conjugated Langmuir–Blodgett films of oligo-acene amphiphiles, 218
